MSU- Northern will now sell you the packet only for your apprentices course work. Please note that the most recent edition of the text book must be used (out dated text books, work books, and course work may not match the most recent instruction sheet)). We anticipate that this will save the employer from having an assortment of text books, often the same ones in their libraries, and allows the students to reuse the text books purchased by their employer. We reserve the right to adjust the cost of these text books as our publishers raise their prices.

If you were to total just the packet only prices, you will reach a figure of \$ 1990.75. As you can see this a substantial savings over the present price sheet, even though the over all prices went up. We encourage you to reuse your present text books and to continue to do business with MSU-Northern.

If you have any further questions please call me
